GARNET-S

NICKEL-S

VULCAN-S

Use this 115 pcf Color sheet for preliminary selection for your project. Please request physical samples for final color selections as colors displayed on this sheet may differ from actual samples due to printing reproduction limitations, computer monitors and variances in production runs. These colors were specifically designed for use with pre-insulated CMU, such as Hi-R and Hi-R H wall systems, as they provide improved Thermal Properties versus Normal Weight mix designs.
