

Concrete Masonry Technical Resources

The National Concrete Masonry Association is the technical resource for the Concrete Masonry Industry. For 100 years, NCMA has advanced the industry through education, research, and building code advocacy.

NCMA's engineers are on call daily to answer your technical masonry questions and can be reached at 703 713 1900 or by directly contacting any of the engineers listed below:

Jason J. Thompson

Vice President of Engineering

571-224-0933

jthompson@ncma.org

Gabriela Mariscal, P.E.

Director of Geotechnical Systems

571-224-0931

gmariscal@ncma.org

Brian Roye

Engineering Projects Manager – Structural

571-224-0932

broye@ncma.org

Nicholas R. Lang, P.E.

Director of Business Development

571-224-0935

nlng@ncma.org

The National Concrete Masonry Association is the technical resource for the Concrete Masonry Industry. For 100 years, NCMA has advanced the industry through education, research, and building code advocacy.

NCMA's on-line Solution Center can be reached through Barnes & Cone's website at:

www.barnesandcone.com

At the top of the webpage click on the NCMA logo and you will be taken directly to the NCMA Solution Center:

NCMA's Solution Center contains:

TEK: These are a series of technical topics for industry professionals that focus on the effective design and construction of concrete masonry systems.

Details: These downloadable details will help architects and engineers reduce design time.

Software: Various free software packages for designing different components of concrete masonry systems plus links to free limited time trials of more extensive software packages available from NCMA.

Concrete Masonry Designs: Archived issues of NCMA's design magazine on case studies, building features and best practices for the use of concrete masonry and hardscape products.

Other Resources: NCMA Publications, research reports, frequently asked questions, videos and industry links.
