

**Barnes & Cone**  
ARCHITECTURAL MASONRY  
*Manufacturers of Concrete Masonry Since 1926*

## Column Concrete Masonry Units

The tan 16" Diameter Columns above were manufactured with a Sand Weathered Decro Face texture. The columns were used as free standing structural columns and as decorative columns laid against the split face wall.

Most people's perception is that Concrete Masonry Units (CMU) are limited to square or rectangular dimensions. But CMU are much more flexible than that and are manufactured in a creative selection of special shapes and colors. The Column units shown above are one example.

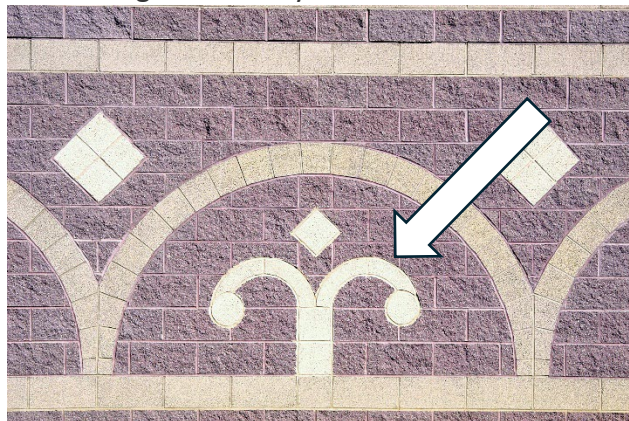

16" Diameter Column CMU laid against the split face wall; the same color and texture was used in bands above.

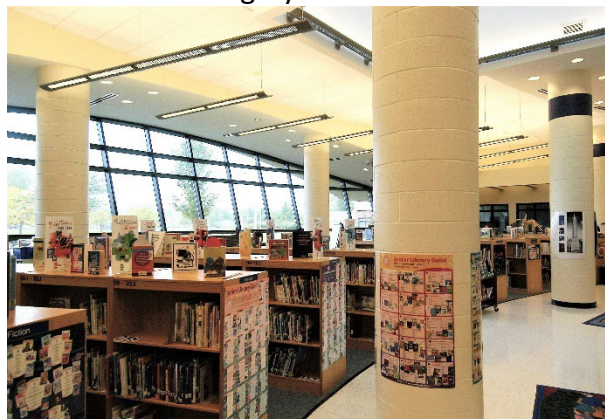

The purple 30" Diameter Columns above were manufactured with a sand weathered Decro Face texture.

The Onondaga Nation used CMU as the design basis of symbolism of the Haudenosaunee.

Notice that the top of column cmu were used for the curved features of the Haudenosaunee symbolism.

Column CMU can be manufactured in gray color and then coated using a masonry stain

30' Diameter Columns used in a school library

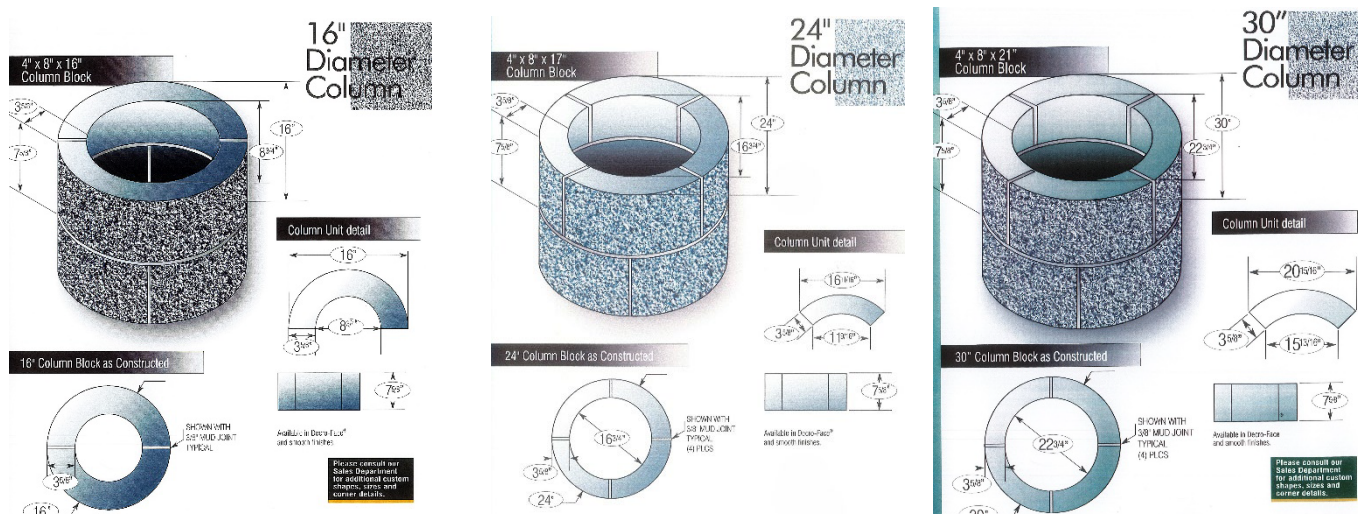

Soule Road Elementary used 30" diameter columns as a feature throughout the school. Manufactured in gray, the architect used a masonry coating for color and stripes.

### Column CMU are manufactured in three diameters:

16" Diameter: two 3 5/8" wide x 7 5/8" high x 16" long CMU make a 16" diameter Column

24" Diameter: four 3 5/8" wide x 7 5/8" high x 16 11/16" long CMU make a 16" diameter Column

30" Diameter: four 3 5/8" wide x 7 5/8" high x 20 15/16" long CMU make a 16" diameter Column
